INSTALLATION CHECKLIST

To ensure no part of the installation process has been overlooked, complete the checklist below.

☐ Have all packaging materials been removed?
☐ Are the anti-tip brackets securely installed and properly engaging the unit?
☐ Has the unit been properly leveled? Do all leveling legs touch the floor?
☐ Is the kickplate installed?
☐ Is the doorstop being installed (if needed)?
☐ Does the customer understand the unit’s operation?
☐ Has the customer been given the key and literature package?
☐ Have all stainless steel surfaces been inspected for imperfections?*
☐ Is the unit operating correctly? If not, is the unit plugged in? Is the control turned on?

*To be completed by either an installer with the customer or an authorized TRUE dealer upon completion of installation. Stainless steel doors, handles, and shelves are covered by a limited 30-day warranty for cosmetic defects.

SERIAL LABEL LOCATION

CONTACT INFORMATION
WARNING! Use this appliance for its intended purpose as described in this Installation Manual.

This appliance is to be installed in accordance with local and federal regulations, as well as Safety Standard for Refrigeration Systems ANSI/ASHRAE 15.

REFRIGERANT SAFETY & WARNING INFORMATION

See the serial label inside the cabinet for the units refrigeration type. For Hydrocarbon Refrigeration (R-600a only), see below:

DANGER! Risk of fire or explosion. Flammable refrigerant used.

• DO NOT use mechanical devices to accelerate the defrost process or to clean.
• DO NOT puncture, pierce, or burn refrigerant tubing.
• Be aware that refrigerants may not contain an odor.
• Store the appliance in a room without continuously operating ignition sources.
• Follow handling instructions carefully.
• To be repaired only by trained service personnel.
• Consult repair manual/owner’s guide before attempting to service this product. All safety precautions must be followed.
• Dispose of properly in accordance with local and federal regulations. Follow all safety precautions.

CAUTION! Keep all ventilation openings clear of obstruction in the appliance enclosure or in the structure housing the appliance.

BASIC SAFETY & WARNING PRECAUTIONS

• Take care during operation, maintenance or repairs to avoid cuts or pinching from any part/component of the cabinet.
• Units may pose a tipping hazard while uncrating, during installation, or when moving the unit.
• Ensure the unit is properly installed and located in accordance with the Installation Instructions before use.
• This appliance is not to be used, cleaned or maintained by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instruction.
• DO NOT allow children to play with the appliance or climb, stand, or hang on the unit’s shelves to prevent damage to the refrigerator and personal injury.
• DO NOT touch the cold surfaces in the freezer compartment when hands are damp or wet. Skin may stick to these extremely cold surfaces.
• Unplug the refrigerator before cleaning and making repairs.
• Setting temperature controls to the 0 position or powering off an electronic control may not remove power from all components (e.g., light circuits, perimeter heaters, and evaporator fans).
• DO NOT store or use gasoline, or other flammable vapors and liquids, in the vicinity of this or any other appliance.
SAFETY INFORMATION & OWNERSHIP

• **DO NOT** store explosive substances such as aerosol cans with a flammable propellant in this appliance.

• Keep fingers out of the "pinch point" areas; clearances between the doors and cabinet are necessarily small; be careful closing doors when children are in the area.

• **DO NOT** use electrical appliances inside the food storage compartments of the units unless the appliances are of the type recommended by the manufacturer.

**NOTE: ALL SERVICING MUST BE PERFORMED BY A QUALIFIED TECHNICIAN.**

CABINET DISPOSAL WARNING

DANGER! RISK OF CHILD ENTRAPMENT

PROPER DISPOSAL OF THE CABINET

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators are still dangerous, even if they will sit for "just a few days." If you are getting rid of your old refrigerator, please follow the instructions below to help prevent accidents.

**Before throwing away your old refrigerator or freezer:**

• Take off the doors.

• Leave the shelves in place so that children may not easily climb inside.

**DANGER!** Risk of fire or explosion. Flammable insulation and/or refrigerant used. Dispose of all in accordance with local and federal regulations. Follow all safety precautions.
SAFETY INFORMATION & OWNERSHIP

OWNERSHIP
To ensure that your unit works properly from the first day, it must be installed properly. We highly recommend a trained refrigeration mechanic and electrician install your TRUE equipment. The cost of a professional installation is money well spent.

This appliance is intended to be used in household and similar applications such as:

- Staff kitchen areas in shops, offices and other working environments.
- Bed and breakfast type environments.
- Catering and similar non-retail applications.

Before you start to install your TRUE unit, carefully inspect it for freight damage. **If damage is discovered, do not install the unit or put it in service.** Notify TRUE customer service and immediately file a claim with the delivery freight carrier.

TRUE is not responsible for damage incurred during shipment.

For any questions about installation, please contact your TRUE dealer or TRUE Residential Technical Service at 844-746-9423 or trueresidentialservice@truemfg.com. Please have your model and serial number available.

NOTICE TO CUSTOMER
Loss or spoilage of products in your refrigerator/freezer is **not covered by warranty.** In addition to following recommended installation procedures, run the refrigerator/freezer for 24 hours prior to usage to verify its proper operation.

APPLIANCE LOCATION
This appliance has been tested for IEC to ISO Climate Class 5 [104°F (40°C) temperature, 40% relative humidity].

REGISTER YOUR PRODUCT
To qualify for TRUE's extended 7–12 year parts only sealed system warranty, you must register your product* within 12 months of the unit’s installation date. To register your unit, complete and submit the form at true-residential.com/product-registration. For warranty details, please see page 75.

* Please note that ice machines do not qualify for this extended warranty.

SERIAL LABEL LOCATION
The serial label is located on the left wall near the freezer wire basket or the refrigerator upper drawer. See fig. 1.

This label contains important information such as your model name and serial number. Please have this information on hand when contacting TRUE so we can better assist you with your service- or parts-related inquiries.

ANTI-SWEAT FOAM END PANELS

When installing two or more TRUE units side-by-side, be sure to leave at least a 5/8" (15.88 mm) gap between the cabinets, or install foam pads between the cabinets and on any side without this gap, to prevent moisture from developing on applications.

If installing anti-sweat foam end panels, TRUE recommends applying a panel to each of the units being joined together. To order foam pads, contact our parts department at 844-849-6226 or TrueResidentialParts@TrueMfg.com.
SITE PREPARATION

ELECTRICAL SAFETY

Power Supply: 115VAC, 60hz
Circuit Breaker: 15 Amp
Receptacle: 3-Prong Grounding-Type

- For all built-in models, the electrical supply should be located within the indicated shaded area shown in the figure below.
- Be sure to follow the National Electrical Code, as well as local codes and ordinances, when installing the receptacle.
- A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.
- The power cord from this appliance is equipped with a grounding plug which minimizes the possibility of electric shock hazard.
- The wall outlet and circuit should be checked by a licensed electrician to be sure the outlet is wired with the correct polarity and properly grounded.
- If the outlet is a standard 2-prong outlet, it is your personal responsibility and obligation to have it replaced with a properly grounded wall outlet.
- **DO NOT**, under any circumstances, cut or remove the ground prong from the power cord. For personal safety, this appliance must be properly grounded.
- The refrigerator/freezer should always be plugged into a dedicated electrical circuit. This provides the best performance and prevents building wiring circuits from overloaded, which could cause a fire hazard from overheated wires.

- **NEVER USE AN ADAPTER PLUG!**
  An adapter plug alters the original equipment manufacturer (OEM) plug configuration when connecting it to a power source. TRUE will not warranty any refrigerator/freezer that has been connected to an adapter plug.

- **NEVER USE AN EXTENSION CORD!**
  An extension cord is any component that adds length to the OEM power cord when connecting it to a power source. TRUE will not warranty any refrigerator/freezer that has been connected to an extension cord.

- Before your new unit is connected to a power supply, check the incoming voltage. If the recorded voltage is less than the rated voltage for operation (+/-5%) and amp rating, correct immediately. Refer to the serial label for this voltage requirement.

- **NEVER** unplug your refrigerator/freezer by pulling on the power cord. Always grip the plug firmly and pull straight from the outlet.

- When moving the refrigerator/freezer for any reason, take care to no roll over or damage the power cord.

- **DO NOT** use a power cord that shows cracks or abrasion damage along its length or at either end. Immediately repair or replace all power cords that have become frayed or otherwise damaged.

- If the supply power cord is damaged, replace it with OEM components. To avoid hazard, this should be done by a licensed service provider or similarly qualified person.
POWER CORD

**INSTALLATION**
Fully seat the power cord into the cabinet receptacle until it locks in position. See fig. 1.

**REMOVAL**
Depress the red button. See fig. 2.

![Fig. 1. Fully insert the power cord into the receptacle.](image1)

![Fig. 2. Push the red button to remove the plug.](image2)

OPTIONAL ICEMAKER REQUIREMENTS (TR-30FRZ/36FRZ-IM-C)

WATER SUPPLY REQUIREMENTS

**WARNING!** Only connect to a potable water supply!

**AVERTISSEMENT!** Raccorder uniquement à une source d’eau potable!

Units with optional ice makers come with 20” (508 mm) of polyethylene tubing with a 1/4” O.D. push connector for customer attachment.

Before installing your unit, prepare the water supply line. Please see plumbing requirements in the plumbing requirements table.

- Purge the water line prior to final connection to the unit. This removes any debris present in the line.
- Only connect to a potable water supply!
- Do not connect to a hot water supply!
- Install the water filter before turning on the water supply to the icemaker. See “Water Filter Installation” (page 18).
- A copper line is not recommended for this application.
- Check all water line fittings for leaks.
- Tape the supply line to the floor before moving the unit into its final installation location.
- In the water connection area (see the rough opening illustration), tape the water line to the floor.

WATER FILTER INSTALLATION & PERFORMANCE DATA

The water filter filters sediment and removes unpleasant taste and odor. Install the provided water filter before using the icemaker. The unit will not make ice until the water filter is installed.

PROCEDURE
1. Remove the kickplate. See fig. 1.
2. Insert the provided water filter (see fig. 2) and rotate the filter clockwise. (See figs. 3 and 4).
3. Reinstall the kickplate.

WATER FILTER PERFORMANCE DATA

- This system has been tested according to NSF/ANSI Standard 42, 53, 372, 401, P473 and CSA B483.1 for reduction of the substances listed below. The concentration of the indicated substances in water entering the system was reduced to a concentration less than or equal to the permissible limit for water leaving the system, as specified in NSF/ANSI Standards 42, 53, 372, 401, P473 and CSA B483.1.

- Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts. The system conforms to NSF/ANSI 42, 53, 372, 401, P473 and CSA B483.1 for the specific performance claims as verified and substantiated by test data. Conforms to NSF/ANSI 53 for VOC reduction. See below for individual contaminants and reduction performance.

NOTE: TESTING WAS PERFORMED UNDER STANDARD LABORATORY CONDITIONS, ACTUAL PERFORMANCE MAY VARY.
### WATER FILTER INSTALLATION & PERFORMANCE DATA (CONT.)

- It is essential that the manufacturer's recommended installation, maintenance and filter replacement requirements be carried out for the product to perform as advertised. Manufactured by Aquamor, LLC, Temecula, CA.

WIRE RACK HANDLE FINISH APPLICATION (TR-30DZW)

See finish (e.g., paint or stain) for application instructions and drying / curing times. Drying / Curing times vary by finish. Follow recommended guidelines associated with treating unfinished natural cherry wood.

**NOTE: REMOVE THE WINE RACK HANDLES FROM THE WINE RACK ASSEMBLY BEFORE APPLYING FINISH!**

**NOTE: FINISH ODORS FROM PANELS INSTALLED BEFORE FULLY DRYING / CURING CAN LINGER AND BE ABSORBED BY THE CABINET’S INTERIOR. TRUE IS NOT RESPONSIBLE FOR LINGERING FINISH ODORS INSIDE THE UNIT.**

**REMOVAL**

**REQUIRED TOOLS**

- Phillips Screwdriver or Bit Driver
- Drill (optional)

**PROCEDURE**

1. Pull the wine rack forward.

2. Push the slide release tabs as indicated by the release arrows (see fig. 1) and pull the wine rack forward.

3. Remove the wine rack handle from the wine rack assembly. See fig. 2.

**INSTALLATION**

**REQUIRED TOOLS**

- Phillips Screwdriver or Bit Driver
- Drill (optional)

**PROCEDURE**

1. Install the wine rack handle on the wine rack assembly. See fig. 2.

2. Position the wine rack on the slides and carefully push the wine rack towards the back of the unit.

TEC_TM_009 | REV. I | EN 03/21/2023 TR-30/36 INSTALL MANUAL Page 27 of 76
UNCRATING

ANTI-TIP BRACKET INSTALLATION

LEVELING

KICKPLATE INSTALLATION

JOINING KIT INSTALLATION
UNCRACTING

REQUIRED TOOLS

- Drill or ratchet
- 7/16" Deep well socket
- Cutting Tool

WARNING! TIP OVER HAZARD. Unit poses a tipping hazard when moving or during installation. Do not move the unit without the shipping brackets installed.

Do not remove the appliance from the pallet without assistance. Failure to do so may result in property damage, personal injury, or death.

NOTE: YOUR APPLIANCE MAY NOT EXACTLY MATCH FIGURES SHOWN.

PROCEDURE

1. Inspect the pallet exterior packaging for visible damage. See fig. 1. Follow TRUE’s recommended procedure for accepting deliveries.

2. Remove the exterior packaging. Inspect the unit’s exterior for visible or cosmetic damage. See figs. 2 and 3

NOTE: DO NOT DISCARD THE KICKPLATE (SEE FIG. 4) IF MOVING THE UNIT A LONG DISTANCE (E.G., BETWEEN BUILDINGS OR ON STAIRS), DO NOT DISCARD THE EXTERIOR CARDBOARD.

FIG. 1. Inspect the exterior packaging for visible damage.

FIG. 2. Inspect the unit’s exterior for visible damage.

FIG. 3. Be sure to inspect behind the rainshield.

FIG. 4. Packaged kickplate ships tucked under the unit’s front.
3. Closely inspect the unit’s interior for damage (e.g., scratches by shelving or damage to the door seal). See fig. 5.

NOTE: DO NOT REMOVE THE INTERIOR PACKAGING.

4. Move the unit as close as possible to the final installation location.

NOTE: SECURE THE DOOR BEFORE MOVING THE UNIT TO ITS FINAL LOCATION (SEE FIG. 6). REPACKAGE THE UNIT WITH THE EXTERIOR PACKAGING AS NEEDED BEFORE MOVING THE UNIT.

5. Unbolt the shipping bracket from the castor housing. Then, remove the anti-tip bracket. See figs. 7 and 8.

NOTE: DO NOT DISCARD THE ANTI-TIP BRACKET.
UNCRATING (CONT.)

6. Slightly raise the rear leveling leg rollers. Turn the front adjustment screw 1/4-1/2 turn clockwise. See fig. 9.

7. With assistance, pull the unit off the back of the pallet. Then, remove the pallet and carefully guide the unit to a fully upright position. See figs. 10a, 10b, and 10c.

**CAUTION!** Only lift with appliance moving equipment from the unit’s sides, never the front or rear. See fig. 11. Failure to do so may result in personal injury or appliance damage. Do not lift the unit by handles, doors, or hinges.

---

FIG. 9. Adjustment screw location. Other adjustment screw not shown.

FIG. 10a. With assistance, carefully walk the appliance partially off the back of the skid.

FIG. 10b. Then, tilt the unit backward and remove the skid.

FIG. 10c. Carefully guide the appliance to an upright position.

FIG. 11. Only lift with appliance moving equipment from the SIDES, NEVER the FRONT or REAR.
ANTI-TIP BRACKET INSTALLATION

KIT CONTENTS
- One (1) anti-tip bracket
- Four (4) 3/16" masonry screws
- Eight (8) #12 – 2" wood screws
- Twelve (12) 1/4" washers

REQUIRED TOOLS
- Tape measure
- 7/16" socket
- Marking utensil
- Phillips bit driver
- 1/8" drill bit
- Drill or ratchet

WARNING! TIP OVER HAZARD. To avoid a hazard from appliance instability, install the anti-tip bracket in accordance with the instructions below.

BEFORE YOU BEGIN
Consult a flooring expert to confirm that the flooring where the unit will be installed is rated for at least 150 pounds per square foot.

PROCEDURE
1. Measure and mark the depth of the bracket’s placement in the installation location.
   - For a flush installation: 24-31/32" (634.20625 mm)
   - For a proud installation: 22-31/32" (583.40625 mm)
2. Place and center the bracket at the measured depth.
3. With the bracket as a guide, drill pilot holes into the wall and/or floor.
   NOTE: FOR INCREASED STABILITY, SECURE THE BRACKET TO AS MANY JOISTS AND/OR STUDS AS POSSIBLE.
4. With the provided hardware, secure the anti-tip bracket.
5. Adjust the rear leveling rollers 1/4 turn clockwise.
6. Slide the unit into place and hook the anti-tip bracket into the castor assembly slots.

30 INCH / 36 INCH UNIT

Dimensions may vary by ± 1/8" (3.2 mm)
LEVELING

It is important that your unit is level. This ensures the doors align and seal correctly and drain pans do not spill over.

PROCEDURE

1. Place a level on the interior floor on the unit. Check the level back-to-front and side-to-side. See fig. 1 for leveling adjustment locations.

2. Adjust the front leveling legs as needed with pliers or an adjustable wrench.

3. Adjust the rear leveling legs as needed with a 7/16” socket. Turn clockwise to raise the rear of the unit.

FIG. 1. Leveling leg adjustment locations.
KICKPLATE INSTALLATION

The kickplate (see fig. 1) is shipped unattached to the unit to allow easy access for leveling the unit. The kickplate attaches to the unit with magnets (see fig. 2) located on either side at the bottom of the unit.

**INSTALLATION**

After leveling the unit, position the kickplate at the bottom of the unit’s front. See fig. 3.

**REMOVAL**

Pull the kickplate away from the unit.

---

**FIG. 1.** The kickplate.

**FIG. 2.** The magnets. One side shown.

**FIG. 3.** Installed kickplate.
JOINING KIT INSTALLATION

Kit Sizes: 60" (1524 mm) / 72" (1828.8 mm) / 78" (1981.2 mm) / 90" (2286 mm)

KIT CONTENTS

- (1) Joining Rainshield Assembly
- (1) Joining Kickplate
- Anti-Sweat Foam End Panels*
- Joining Bracket*
- 1/4-20 x 1" Hex Head Screws*
- 1/4" Split Lock Washers*

*Quantities vary by kit size.

REQUIRED TOOLS

Required tools include (but may not be limited to) the following:

- Phillips Bit Driver or Screwdriver
- 7/16" Socket Wrench
- 1/4" Socket Wrench
- Tape
- Marking Utensil
- Drill

NOTE: MAKE SURE THE ANTI-TIP BRACKETS ARE INSTALLED PER INSTALLATION MANUAL INSTRUCTIONS. EACH UNIT WILL ALSO NEED TO BE PROPERLY LEVELLED PER INSTALLATION MANUAL INSTRUCTIONS.

CAUTION! Electrical shock or burn hazard. Unplug the unit or turn off the power supply before proceeding.

WARNING! To avoid hazards from appliance instability, be sure to install the anti-tip brackets (see fig. 1) on each individual unit per the installation manual instructions.

WARNING! TIP OVER HAZARD. A child or adult could tip the appliance, resulting in property damage or bodily harm. Follow these instructions to properly install the anti-tip device. If the appliance is moved, verify that the device is properly engaged before the normal usage of the appliance commences.

FIG. 1. Anti-tip bracket. Be sure to install a bracket for each unit.

FIG. 2. Pull the rainshield open.

FIG. 3. Locate the reed switch in the bottom of the rainshield.

FIG. 4. Remove the plastic cover.
JOINING KIT INSTALLATION (CONT.)

Kit Sizes: 60” (1524 mm) / 72” (1828.8 mm) / 78” (1981.2 mm) / 90” (2286 mm)

PROCEDURE

1. Remove the reed switch bracket. See figs. 2 and 3.

2. Remove the reed switch cover, and then disconnect the reed switch. See figs. 4 and 5.

   **NOTE:** IF FOUR (4) WIRES ARE CONNECTED TO THE REED SWITCH, BE SURE TO CLEARLY LABEL THE WIRES’ ORIGINAL LOCATIONS BEFORE DISCONNECTING THE REED SWITCH. WIRE LOCATION IS CRITICAL TO THE CABINET’S OPERATION. SEE FIG. 5.

3. Remove the reed switch wire from the rainshield. See figs. 6 and 7.

4. Remove the rainshield. See figs. 8-10.

5. Repeat steps 1-4 for each unit of the joined installation.

6. Remove the inner magnet brackets (see figs. 11 and 12). Then, thread and tighten the magnet bracket screws. Discard the magnet bracket.

   **NOTE:** BE SURE TO RETURN MAGNET BRACKET SCREWS TO THEIR ORIGINAL POSITIONS; THE SCREWS SUPPORT THE CASTOR ASSEMBLY HOUSING.

---

**FIG. 5.** Label the original wire locations **BEFORE** disconnecting the reed switch.

**FIG. 6.** Remove the p-clip holding the wire to the rainshield.

**FIG. 7.** Pull the reed switch wire through the rainshield bushing.

**FIG. 8.** Bracket screw location. Other bracket not shown.

**FIG. 9.** Rainshield screw locations.

**FIG. 10.** Remove the screws from the metal channel.
JOINING KIT INSTALLATION (CONT.)

Kit Sizes: 60" (1524 mm) / 72" (1828.8 mm) / 78" (1981.2 mm) / 90" (2286 mm)

7. Install anti-sweat foam end panels on the joined units’ sides where the cabinets will meet. See figs. 13 and 14.

8. Position the units in front of the final installation location. Then, level the units.

9. Verify the fronts of the units are flush at the seams and the gap(s) between the units is (are) consistent from top to bottom. See figs. 15 and 16.

10. With the provided hardware, install the joining bracket across the interior legs. See figs. 17 and 18.

11. With the existing hardware, install the joining rainshield assembly. See fig. 19.

**NOTE: ASSISTANCE (AT LEAST TWO (2) PEOPLE) RECOMMENDED.**

12. Route the reed switch wires through the rainshield. See figs. 6 and 7.

13. With the predrilled holes in the joining rainshield, connect and install the reed switches near the handle-side of the units.

**NOTE: BE SURE TO CONNECT THE WIRES TO THE REED SWITCH AS ORIGINALLY CONFIGURED. WIRE LOCATION IS CRITICAL TO THE CABINET’S OPERATION. SEE FIGS. 5 OR 20.**

14. Install foam pads between the joined units.
14. Walk the joined units into their final installation location.

15. Verify the level of the cabinets. Level the units as needed.

16. Restore power to the units and turn the units on.

17. After 3 minutes of runtime, open the doors individually and verify correct door switch operation. When operating correctly, the following should occur:

   - Unless set otherwise, the lights turn on and off with the door openings.
   - The evaporator (interior) fan turns on and off with door openings.
   - There is a low-pitched click from the control board area when the door opens or shuts.

18. Install the joining kit grill.

FIG. 15. Verify the cabinet fronts are flush. Adjust the units accordingly.

FIG. 16. Verify the gap(s) between cabinets is (are) even throughout.

FIG. 17. Return the magnet bracket screws to their original locations.

FIG. 18. Installed joining bracket.

FIG. 19. Installed joining rainshield.

FIG. 20. Connect the reed switches with the original wire configurations.
CABINET SETUP

SHELVING, BINS, DRAWERS

REFRIGERATOR STORAGE

DOOR BINS

DRAWERS

FREEZER STORAGE

WIRE BASKET

OPTIONAL ICEMAKER
SHELVING, BINS, DRAWERS

Your TRUE appliance ships with shelving and drawers installed. Door bins ship packaged inside the unit. See fig. 1.

This appliance meets the IEC shelf weight capacity of 47 lb/ft² (230 kg/m²).

REFRIGERATOR STORAGE

GLASS SHELVES

Remove interior packaging before use. See fig. 2.

ADJUSTMENT

1. Tilt the shelf front forward. See fig. 3.
2. Lift the shelf up and out of the unit.
3. Hook the shelf into the desired shelf standard slots. See fig. 4.
DOOR BINS
Door bins ship in the refrigerator’s bottom drawer. See fig. 5.

INSTALLATION
1. Hook a door bin into the door slots. See fig. 6.
2. Push the bin down to ensure the tabs are fully engaged in the slots. See fig. 7.

CAUTION! INCORRECTLY INSTALLED DOOR BINS MAY RESULT IN APPLIANCE DAMAGE OR PERSONAL INJURY.

REMOVAL
Lift the door bin up and away from the door.

FIG. 5. Packaged door bins.
FIG. 6. Hook the door bins into the door slots.
FIG. 7. Final door bin installation.
DRAWERS

REMOVAL
1. Pull the drawer fully forward.
2. Remove the drawer slide screws. See fig. 8.
3. Lift the drawer from the unit.

REMOVAL
1. Pull the drawer slides fully forward.
2. Position the drawer on the drawer slides and carefully push the drawer towards the back of the unit. Lift the drawer from the unit.

NOTE: BE SURE THE DRAWER SITS UNDER THE SLIDES’ REAR TABS. SEE FIG. 9.
3. Reinstall the drawer slide screws.
CABINET SETUP

FREEZER STORAGE

WIRE SHELVES
Your TRUE appliance ships with shelving installed. Remove interior packaging before use. See fig. 10.

ADJUSTMENT
1. Tilt the shelf front forward. See fig. 11.
2. Lift the shelf up and out of the unit.
3. Hook the shelf into the desired shelf standard slots. See fig. 12.

WIRE BASKETS

REMOVAL
1. Pull the drawer fully forward.
2. Remove the drawer slide screws. See fig. 13.
3. Lift the drawer from the unit.

INSTALLATION
1. Pull the drawer slides fully forward.
2. Position the drawer on the drawer slides and carefully push the drawer towards the back of the unit. NOTE: Be sure the drawer sits under the slides’ rear tabs. See fig. 14.
3. Reinstall the drawer slide screws.

FIG. 10. Interior packaging.
FIG. 11. Hook the shelves into the shelf standards.
FIG. 12. Installed shelving.
FIG. 13. Drawer slide screw locations.
FIG. 14. Drawer slide screw locations.
OPTIONAL ICEMAKER

The icemaker (see fig. 1) is in the rear upper left of the freezer section. For water supply requirements, please see “Water Supply Requirements” (page 17). To turn the icemaker on, please see “Ice Menu Navigation” (page 55).

- The icemaker will not operate if the water filter has not been installed. See “Water Filter Installation” (page 18) for installation instructions.
- After the initial startup, discard the first batch of produced ice. This ice may contain impurities from new plumbing connections.
- Do not remove the ice bin, even if the icemaker is not in use. The ice bin prevents stacked product from damaging the icemaker.
- If ice is not used regularly, it may fuse together. To avoid this, discard the ice and allow the icemaker to replenish.

ICE SCOOP

The ice scoop ships inside the ice bin. See fig. 2.

MAX ICE

When the max ice is turned on, the unit maximizes ice production for 24 hours. For information on turning Max Ice on or off, please see “Ice Menu Navigation” (page 55).
NOTE: AN ELECTRONIC CONTROL DISPLAY MAY REFLECT THE FLUCTUATING TEMPERATURES OF THE REFRIGERATION CYCLE, NOT THE PRODUCT TEMPERATURE. THE MOST ACCURATE METHOD TO DETERMINE AN APPLIANCE'S OPERATION IS TO VERIFY THE PRODUCT TEMPERATURE.

MODE NAVIGATION

This page explains the following models:

- HOLIDAY Mode
- Temperature Unit Selection Mode
- VACATION MODE

HOLIDAY MODE

NOTE: IN HOLIDAY MODE, SET POINTS CANNOT CHANGE AND MANUAL DEFROST CANNOT INITIATE.

The following holds TRUE in accordance with Star-K requirements:

- Freezer defrosting function switch to a fixed time-based sequence.
- The compartment/zone thermistors detect cut-in and cut-out temperatures (determining factor to start/stop cooling), but there is a random 16-21 second delay before cooling begins/ends.
- The display shows HOLIDAY MODE ACTIVE when the door is closed.

VACATION MODE

Vacation mode is operation optimized for energy savings.

MODE NAVIGATION

VACATION MODE MINUS ONE DOOR OPENING

MODE NAVIGATION
SHOWROOM MODE

SHOWROOM MODE DISABLES THE REFRIGERATION SYSTEM. The appliance will not cool or defrost; however, the lighting system and door ajar alarm system function, and the display shows the set points.

NOTE: ALL MENUS ARE DISPLAY ONLY. ANY SETTING CHANGES WILL NOT AFFECT THE REFRIGERATION SYSTEM'S OPERATION UNTIL SHOWROOM MODE IS OFF.

SHOWROOM MODE ON
1. Press both power and down until the display shows the service warning.
2. Press down.
3. Press down until SHOWROOM MODE OFF is selected.
4. With SHOWROOM MODE OFF selected, press MODE.

SHOWROOM MODE OFF
1. Press both power and down until the display shows the service warning.
2. Press down.
3. Press down until SHOWROOM MODE ON is selected.
4. With SHOWROOM MODE ON selected, press MODE.

FREEZER

MODE LIGHT ALARM
ACCENT LIGHTING SYSTEM

All models are equipped with an accent lighting system in the refrigerator/freezer compartment(s).

PROCEDURE

1. Press LIGHT.
2. With the arrow buttons, navigate to the desired menu option.
3. With the desired option selected, press LIGHT to toggle between options.

LIGHT MODE: Interior lights
BACKLIGHT: Display

ON mode: Stays illuminated when the door is closed.

NOTE: WHEN IN ON MODE, LIGHTS WILL NOT FADE-UP WHEN THE DOOR OPENS.

DOOR mode: Only illuminates when the door is open.

LIGHT NAVIGATION
**ALARM NAVIGATION (DOOR AJAR ALARM FEATURE ON/OFF)**

All models are equipped with a door ajar alarm. The door ajar alarm beeps continuously when the door is left open for more than 5 minutes. During a door ajar alarm, the display shows the notification icons.

**ENABLE:**

Press ALARM. The display will show DOOR ALARM IS ON.

**DISABLE:**

Press ALARM. The display will show DOOR ALARM IS OFF.

---

**ALARM NAVIGATION**
NOTIFICATION ALERTS

The following notification alerts may show on the display if the appliance needs attention.

- DEFROST
- HIGH TEMP
- SHOWROOM MODE
- COMMUNICATION ERROR
- SERVICE REQUIRED
- DOOR ALARM
ICE MENU NAVIGATION (OPTIONAL ICEMAKER ONLY)

To enter the Ice Menu, press ICE on the user interface. Use the UP and DOWN arrows to navigate between the menu options and use ICE to make a selection. See the diagram below.

The Ice Menu contains three operations.

- Ice Maker: Toggles the icemaker between on/off.
- Max Ice: Maximizes ice production for 24 hours.
- Water Filter Reset: Immediately resets the countdown to change the water filter.

ICE TROUBLESHOOTING

Please see the table below to troubleshoot some common problems with ice production. If your issue is not resolved, please contact TRUE Residential Service at 844-746-9423 or TRUEResidentialService@TRUEMfg.com.

ON mode: Stays illuminated when the door is closed.

NOTE: WHEN IN ON MODE, LIGHTS WILL NOT FADE-UP WHEN THE DOOR OPENS.
DOOR mode: Only illuminates when the door is open.

CHANGE TRULUMINA® LIGHT COLOR

PROCEDURE
1. Press LIGHT until the display shows CHANGE COLOR.
2. With the display showing CHANGE COLOR, press LIGHT. The appliance will cycle through the light color options.
3. When the light is the desired color, press LIGHT.

LIGHT NAVIGATION
DUAL ZONE OPERATION

ALARM NAVIGATION (DOOR AJAR ALARM FEATURE ON/OFF)

All models are equipped with a door ajar alarm. The door ajar alarm beeps continuously when the door is left open for more than 5 minutes. During a door ajar alarm, the display shows the notification icons.

ENABLE:
Press ALARM. The display will show DOOR ALARM IS ON.

DISABLE:
Press ALARM. The display will show DOOR ALARM IS OFF.

All removable interior accessories are dishwasher safe.

DOOR REMOVAL

REMOVAL
1. Open the rainshield. See fig. 1.
2. Open the door 90°. See fig. 2.
3. Carefully lift the door from the hinges. See fig. 3

INSTALLATION
1. Open the rainshield. See fig. 1.
2. Hold the door 90° to the opening.
3. Align the hinge posts with the hinges.
4. Lower the door into place.
CONDENSER COIL CLEANING

Keeping the condenser coil clean minimizes required servicing and lowers electrical cost. Warranty does not cover cleaning the condenser coil.

**WARNING!** Electrical shock or burn hazard. Unplug the unit or turn off the power supply before proceeding. **DO NOT** clean appliance with a pressure washer or hose.

**CAUTION!** Risk of eye injury from debris. Eye protection is recommended.

**CAUTION!** Coil fins are sharp. Gloves are recommended.

**REQUIRED TOOLS**

- Stiff-bristled brush
- Vacuum Cleaner
- Gloves (recommended)

**PROCEDURE**

1. Open the rainshield. See fig. 1.

2. With a stiff-bristled brush, carefully clean accumulated dirt from the condenser coil fins. See fig. 2.

**NOTE: NEVER BRUSH ACROSS THE COIL FINS.**

3. Carefully vacuum any dirt around the condensing unit area.

4. Close the rainshield.

**CONденSAATION**

Leaving the doors and/or drawers open for long periods of time or running a unit with little/no product inside may cause excessive condensation.

**HANDLE TIGHTENING**

Tighten handles with a 3/32" Allen wrench.
WATER FILTER REPLACEMENT (OPTIONAL ICEMAKER ONLY)

The ice machine water has a life expectancy of 300 gal (1,136 L) or six months. When the water filter reaches the end of its life, the control display shows WATER FILTER.

To order a replacement water filter, go to https://store.TRUEresidential.com/collections/maintenance-1 or contact our parts department at 844-849-6226 or TRUEResidentialParts@TRUEMfg.com.

Follow the instruction below to change the water filter. For information on clearing the water filter notification, please see “Ice Menu Navigation” (page 55).

PROCEDURE
1. Remove the kickplate. See fig. 1.
2. Rotate the water filter counterclockwise and pull the filter from the unit. See fig. 2.
3. Insert the replacement water filter and rotate the filter clockwise. See fig. 3.
4. Reinstall the kickplate.
MAINTENANCE, CARE & CLEANING

STAINLESS STEEL EQUIPMENT CARE AND CLEANING

NOTE! DO NOT USE ANY STEEL WOOL, ABRASIVE OR CHLORINE BASED PRODUCTS TO CLEAN STAINLESS STEEL SURFACES.

STAINLESS STEEL OPPONENTS

There are three basic things which can break down your stainless steel’s passivity layer and allow corrosion to rear its ugly head.

- Scratches from wire brushes, scrapers, and steel pads are just a few examples of items that can be abrasive to stainless steel’s surface.

- Deposits left on your stainless steel can leave spots. You may have hard or soft water depending on what part of the country you live in. Hard water can leave spots. Hard water that is heated can leave deposits if left to sit too long. These deposits can cause the passive layer to break down and rust your stainless steel. All deposits left from food prep or service should be removed as soon as possible.

- Chlorides are present in table salt, food, and water. Household and industrial cleaners are the worst type of chlorides to use.

STAINLESS STEEL CLEANING AND RESTORATION

Do not use stainless steel cleaners or similar solvents to clean plastic or powder-coated parts. Instead, use warm soapy water.

- For routine cleaning and removal of grease and oil, apply white vinegar, ammonia, or any good commercial detergent* with a soft cloth or sponge.

- Stainless steel polish (i.e., Zep® Stainless Steel Polish, Weiman® Stainless Steel Cleaner & Polish, Nyco® Stainless Steel Cleaner & Polish, or Ecolab® Ecoshine®) and olive oil can act as a barrier against fingerprints and smears.

- Degreasers* (i.e., Easy-Off® Specialty Kitchen Degreaser or Simple Green® Industrial Cleaner & Degreaser) are excellent for removal of grease, fatty acids, blood and burnt-on foods on all surfaces.

- For restoration/passivation or removing stubborn stains and discoloration, Brillo® Cameo®, Zud® Cleanser, Ecolab® Specifax™ First Impression® Metal Polish, Sheila Shine, or talc can be applied by rubbing in the direction of the polish lines.

*DO NOT USE DETERGENTS OR DEGREASERS WITH CHLORIDES OR PHOSPHATES.
8 TIPS TO HELP PREVENT RUST ON STAINLESS STEEL

• **Maintain the Cleanliness of Your Equipment** – Avoid build-up of hard stains by cleaning frequently. Use cleaners at the recommended strength (alkaline chlorinated or non-chloride).

• **Use the Correct Cleaning Tools** – Use non-abrasive tools when cleaning your stainless steel products. The stainless steel’s passive layer will not be harmed by soft cloths and plastic scouring pads.

• **Clean Along Polishing Lines** – Polishing lines (“grain”) are visible on some stainless steels. Always scrub parallel to polishing lines when visible. Use a plastic scouring pad or soft cloth when you cannot see the grain.

• **Use Alkaline, Alkaline-Chlorinated or Non-Chloride Cleaners** – While many traditional cleaners are loaded with chlorides, the industry is providing an ever increasing choice of non-chloride cleaners. If you are not sure of your cleaner’s chloride content, contact your cleaner supplier. If they tell you that your present cleaner contains chlorides, ask if they have an alternative. Avoid cleaners containing quaternary salts, as they can attack stainless steel, causing pitting and rusting.

• **Rinse** – When using chlorinated cleaners, you must rinse and wipe dry immediately. It is better to wipe standing cleaning agents and water as soon as possible. Allow the stainless steel equipment to air dry. Oxygen helps maintain the passivity film on stainless steel.

• **Never Use Hydrochloric Acid (Muriatic Acid) on Stainless Steel** – Even diluted, hydrochloric acid can cause corrosion, pitting and stress corrosion cracking of stainless steel.

• **Water Treatment** – To reduce deposits, soften hard water when possible. Installation of certain filters can remove corrosive and distasteful elements. Salts in a properly maintained water softener can also be to your advantage. Contact a treatment specialist if you are not sure of the proper water treatment.

• **Regularly Restore & Passivate Stainless Steel** – Stainless steel gets its stainless properties from the protective chromium oxides on its surface. If these oxides are removed by scouring, or by reaction with harmful chemicals, then the iron in the steel is exposed and can begin to oxidize, or rust. Passivation is a chemical process that removes free iron and other contaminants from the surface of stainless steel, allowing the protective chromium oxides to re-form.
GENERAL MAINTENANCE, CARE & CLEANING

COMPONENT REPLACEMENT

- Replace components with original equipment manufacturer (OEM) components. OEM parts minimize the risk of possible ignition due to incorrect parts. Use of non-OEM components may void TRUE’s warranty.

- Have a licensed service provider service your unit to minimize the risk of possible ignition due to incorrect parts or improper service and to ensure the operator’s health and safety.

SERIAL LABEL LOCATION

The serial label is located on the left wall near the freezer wire basket or the refrigerator upper drawer.

This label contains important information such as your model name and serial number. Please have this information on hand when contacting TRUE so we can better assist you with your service -or parts- related inquiries.

FIG. 1. Serial label location.

TRUE RESIDENTIAL® SERIES LIMITED WARRANTY STATEMENT

LIMITED 30 DAY COSMETIC WARRANTY
Stainless steel doors, handles, and shelves are warranted to be free from defective materials or workmanship for a period of thirty (30) days from the date of original retail purchase. Any defects must be reported to the selling dealer within thirty (30) days from the date of original retail purchase. This limited warranty excludes any type of freight / concealed damage.

THREE-YEAR PARTS & LABOR WARRANTY *For units purchased after Feb 1, 2013
TRUE® warrants to the original purchaser of every new TRUE refrigerated unit, the cabinet and all parts thereof, to be free from defects in material or workmanship under normal and proper use and maintenance as specified by TRUE and upon proper installation and start-up in accordance with the instruction packet supplied with each TRUE unit. TRUE’s obligation under this warranty is limited to a period of three (3) years from the date of original installation or thirty nine (39) months after shipment date from TRUE, whichever occurs first. Contact the factory regarding warranty for installations in a commercial/light commercial application.

SIX-YEAR SEALED SYSTEM WARRANTY – PARTS & LABOR *For units purchased after Feb 1, 2013
TRUE warrants its hermetically sealed system: compressor, evaporator coil, condenser coil, drier, metering device and connecting tubing to be free from defects in both material and workmanship under normal and proper use and maintenance service for a period of six (6) years from the date of original installation but not to exceed six (6) years and three (3) months after shipment from the manufacturer, whichever occurs first.

SEVEN THROUGH TWELVE-YEAR SEALED SYSTEM WARRANTY – PARTS ONLY
*For units shipped from True after Feb 1, 2017 and REGISTERED via TRUE’s Product Registration Page – TRUE warrants its hermetically sealed system: compressor, evaporator coil, condenser coil, drier, metering device and connecting tubing to be free from defects in both material and workmanship under normal and proper use and maintenance service period of Twelve (12) years from the date of original installation but not to exceed twelve (12) years and three (3) months after shipment from the manufacturer, whichever occurs first. Product must be registered with TRUE within 12 months of the unit’s installation to qualify for this warranty. Factory seconds and clear ice machines are excluded from this warranty.

DISPLAY PRODUCTS
True Residential Products on showroom display that are sold more than 3 years (36 months) from the invoice date to the dealer would carry a 1 year parts and labor warranty, along with an additional 4 year sealed system, parts only warranty.

ADA-COMPLIANT PRODUCTS
True Residential ADA-Compliant models have a separate warranty that is two years parts and labor with an additional three years parts only on the compressor. Full statement can be found under the ADA product Installation Guide.

TERMS APPLICABLE TO EACH WARRANTY
Any part covered under the above warranties that is determined by TRUE to have been defective within the time frame is limited to the repair or replacement, including labor charges, of defective parts or assemblies. The labor warranty shall include standard straight time labor charges only and reasonable travel time, as determined by TRUE.

WARRANTY CLAIMS
All claims for labor or parts must be made directly through TRUE. All claims should include: model number and serial number of cabinet, proof of purchase, and date of installation. In case of warranted compressor, the compressor model tag must be returned to TRUE along with the above listed information.

WHAT IS NOT COVERED BY THIS WARRANTY
TRUE’s sole obligation under this warranty is limited to either repair or replacement of parts, subject to the additional limitations below. This warranty neither assumes nor authorizes any person to assume obligations other than those expressly covered by this warranty.

NO CONSEQUENTIAL DAMAGES
TRUE is not responsible for economic loss, profit loss; or special, indirect or consequential damages, including without limitation, losses or damages arising from food or product spoilage claims whether or not on account or refrigeration failure.

WARRANTY IS NOT TRANSFERABLE
This warranty is not assignable and applies only in favor of the original purchaser/user to whom delivered. Any such assignment or transfer shall void the warranties herein made and shall void all warranties, express or implied, including any warranty or merchantability or fitness for a particular purpose.

IMPROPER USAGE
TRUE assumes no liability for parts or labor coverage for component failure or other damages resulting from improper usage or installation or failure to clean and/or maintain product as set forth in the warranty packet provided with the unit.

ALTERATION OR NEGLECT
TRUE is not responsible for the repair or replacement of any parts that TRUE determines have been subjected after the date of manufacture to alteration, neglect, abuse, misuse, accident, damage during transit or installation, fire, flood, or act of God.

IMPROPER ELECTRICAL CONNECTIONS
TRUE is not responsible for the repair or replacement of failed or damaged components resulting from electrical power failure, high or low voltage, use of extension cords, or improper grounding of the unit.

YOUR RIGHTS UNDER STATE LAW
This warranty gives you specific legal rights and you may have other rights that vary from state to state. Some states do not allow the exclusion or limitation of consequential damages or a limitation on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you.

ENVIRONMENTAL ATTRIBUTES
Any and all environmental attributes, including environmental offset credit rights, with respect to TRUE refrigeration units manufactured after September 1, 2015, shall remain the property of TRUE Manufacturing Co., Inc. and are not transferred.

OUTSIDE U.S./CANADA
This warranty does not apply to, and TRUE is not responsible for, any warranty claims made on products sold or used outside the United States or Canada.
