

TRUE RESIDENTIAL®

LOOKBOOK

The Kitchen Beautiful

Principle

We call something—an object, a moment, a person—
“beautiful” when shape meets need, when form
integrates with function. So when we say that a True
Residential refrigerator is beautiful, we’re standing on
a principle, an aesthetic standard.

Form

True Residential refrigerators take form from the
foresight of the bold, the designers and architects
whose high aesthetic has helped shape everything
from the profile of our hinges to our custom colors and
hardware, which are redrawing the lines of appliance
design.

Function

Every detail of every part—compressor, 304 Series
stainless, dual zone temperature control—has origins
in the workstations of professional chefs, who demand
from their kitchens precision, accountability, and
thoughtfulness.

Beauty

Every moment of a True refrigerator reflects impeccable
taste and surpasses exacting standards. A True
refrigerator exists to anchor the kitchen, serving as a
statement piece and an aesthetic referent that exceeds
the expectations of the most discerning architects,
designers, and consumers. We make refrigerators, but
more than that, we make refrigeration beautiful.

T rue 30" Columns offer designers the freedom to specify kitchens that look the way they want and, as importantly, reflect the way that homeowners live. Pairing a 30" Refrigerator Column with a 30" Freezer,

an undercounter Wine Cabinet, or even with a True Side-By-Side means complete control and complete freedom, and for homeowners and designers alike, that means complete luxury.

For over a decade, we gathered feedback from the design community, world-renowned chefs, and demanding homeowners. Then, we crafted the first full-size True Residential refrigerator, and, in the process, we redefined the concept of the luxury appliance.

The True Residential refrigerator is an aesthetic indicator, a value statement, a retreat from the everyday. The kitchen designed around True is a kitchen designed with boldness and imagination; it's the kind of kitchen a world-renowned chef would design for her own home (or home away from home).

METICULOUS CRAFTSMANSHIP

The details of a True Refrigerator are where our obsession over design and quality is most apparent. From adaptable shelves, drawers, and baskets to ramp-up lighting, every cubic foot denotes luxury. With our 304 Series stainless interior and True Precision temperature control, no detail has been spared. Which is what you expect from True: we’re meticulous down to the last seam, so much so that we won’t attach the True logo until at least 20 of the men and women who have helped build a refrigerator sign their names to it. We’re too proud to do otherwise.

DOOR HINGE

Crafted from solid stainless and designed to stay open at 120°, each high grade hinge passes rigorous testing and boasts a silent, soft close. Others’ hinges are solely functional, designed to fade into the background; True hinges are proud.

DOOR HANDLE

Designed to complement any kitchen interior, the balanced, tubular handles are at once robust and ergonomically minded. In other words, you won’t ever have to think about opening your True—but if you want to, these handles can handle that.

DRAWER

Soft-close glides and a Lexan-like front with integrated handle lend dimensional stability and functional clarity to our stainless steel drawer bins. And that’s before even mentioning the luxurious amount of storage.

GLASS SHELF

When it comes to preparation and storage, professional chefs understand the necessity of flexibility and control. We met those needs by designing stainless steel encapsulated glass shelves that are both adjustable and removable.

RAMP-UP LIGHTING

We’re too proud of our 304 Series stainless steel interior not to shine a light on it. So we developed a dramatic, ramp-up lighting system that—more than merely illuminating—showcases the interior and all that it holds.

CONTROL PANEL

With its simple to use controls and crisp LCD display, The True Control Panel offers a degree of precision and consistent performance found in the kitchens of world-renowned chefs.
